

A Simple Spray System with Low Entry Costs!

ERASPRAY ES81A-HB

Eraspray ES81A HB is a premium grade, high performance solvated polyurethane spray elastomer system with excellent abrasion resistance.

It can be applied with standard airless spray equipment and is supplied in pre-weighed kits packaged in such a way that all three components can be mixed together in the PART A pail.

Eraspray ES81A HB offers:

- Rapid Build Up
 - It can be applied 3 - 4 times thicker than conventional solvated spray elastomers systems without cracking
- Excellent Abrasion Resistance
- Corrosion Protection
- Bonds to most Substrates
 - Subject to correct surface preparation
- Flexible
 - Suitable for expansion and contraction of metal associated with climate change or equipment that is subject to movement
- Application with Standard Airless Spray Equipment
- Cures at Room Temperature
 - Sufficient Green Strength after 16 - 24 Hours
 - Full Cure after 5 days at same temperature
