

Fomo Products for Movie Making

Fomo is conveniently packaged in disposable spray kits suitable for void filling, gluing and much more!
Easy to use with minimum mess.

Era Polymers Pty. Ltd. is the Australian distributor for **Fomo Products Inc.** of Ohio, USA. Fomo Products is part of the FLM group of companies, the largest global manufacturer of one and two component polyurethane foam systems in pressurised disposable packaging.

One-Component Handi-Foam® is best suited for smaller applications and is available for use in a single can or cylinder. The product fills small cracks and voids; is available in both the standard cream colour as well as black.

Two-Component Handi-Foam® is better suited to larger applications where it can be sprayed or poured into cavities/voids and onto surfaces. This two component system comes in disposable cylinders or tanks and is available in a range of densities and sizes.

Handi-Foam® One and Two Component systems form a permanent, crack-resistant barrier and bond quickly to almost any surface, including wood, masonry, metal, glass and plastic.

Handi-Stick® Adhesives are polyurethane adhesives formulated to provide a strong permanent bond between building materials; offering excellent adhesion to drywall, plywood, foam boards, timber, particle boards, concrete, polystyrene and much more, ideal for set construction.

Handi-Stick® was recently used in the construction of a carnival float for The Mardi Gras and the sets for the party after the parade.

Era has a wide range of products suitable for the movie industry including:

- Silicones
- Elastomers
- Self Skinning Foams

These products have featured in many movies including:

- Lord of The Rings
- House of Wax
- The Mask 2
- Babe
- Most recently, 1 & 2 Component Handi Foam was used in the Superman Returns Production.
